Introduction
If your patient does not have a pregnancy added, you will need to add it. This will add your patient’s pregnancy to the database and allows you to add the EDD Maintenance.

Adding a Pregnancy

Step 1  Click on the Add Pregnancy link.

Step 2  Fill out the Add Pregnancy fields.
Step 3 Fill out the *Add EDD Maintenance*.

Step 4 To complete the process, select **OK**.

Step 5 The Pregnancy problem is added to the problem list and the active pregnancy is initiated for the patient. Add Pregnancy window closes, and user can see the ‘Current Pregnancy’ Tab in the ‘Pregnancy Overview’ component. The Current Pregnancy tab displays Active Pregnancy and now staff can review and document in this section.
