You can discontinue an entire Care Plan when the problem is no longer relevant to the patient’s care (e.g., restraints have been removed so you should discontinue the Restraints care plan).

To discontinue a care plan:

**Step 1**  
Right-click on the **Nursing phase of the Care Plan** and select **Discontinue**.

**Step 2**  
Select the **discontinue reason**.

**Step 3**  
Click **OK**, then **Sign**.

**Step 4**  
The Care Plan status in the View window is now Discontinued.

If you select the main Care Plan title, you will discontinue all disciplines’ active Care Plan sections.

To discontinue your discipline’s section only, right click on your subsection of the MCP.
