Related Records

This linking provides nurses with the ability to copy information from the mother’s chart to the baby's chart.

To access the baby’s link, click the Related Records button in the tool bar.

The baby’s chart will open immediately and you will then be able to toggle between the mother and the baby’s chart.

Note: If this mother had multiple births, when you click on Related Records, it may ask you to choose which baby’s chart you want to view.
